## One-pot wonderful

'Oh the weather outside is frightful...' sang Dean Martin, and we all know that feeling of wanting to curl up beside the fire after a long day at work.

It's blissfully warming to tuck into a hearty hotpot, soup or casserole on a cold winter's night. The beauty of quick and easy one-pot cooking is that you need minimal equipment and just a handful of ingredients to rustle up some healthy comfort food. Gather, get cosy and feast, and no bickering about the dishes!
